
PACIFIC FAIR SHOPPING CENTRE UPGRADE IN GOLD COAST AUSTRALIA

GRC LANDSCAPING APPLICATION: AALBORG WHITE[®] CEMI 52.5N

PROJECT DESCRIPTION

International and domestic tourists and shoppers to the \$670 million transformed Pacific Fair Shopping Centre on the Gold Coast, Queensland, are welcomed by new and spacious outdoor resort style surroundings providing a unique shopping experience.

GRC manufacturer Quatro Design supplies large-scale pots, planters, and street furniture to numerous projects around Australia. For the new resort style shopping area at Pacific Fair, Quatro Design supplied numerous GRC bowl planters made using Aalborg White[®] Cement. The planters were made in various styles with sizes ranging from 900mm up to 2.3 metres in diameter.

The transformation of Pacific Fair Shopping centre into an international retail and hospitality destination was recognised by the Queensland Property Awards in awarding it the 2016 Retail Property of the Year, and the 2016 and 2017 Major Regional Centers Excellence in Design.

AALBORG WHITE[®] IN GRC APPLICATION

Within Australia there are several GRC manufacturers. Applications include façade panels; architectural elements in building construction; bases for modular bathrooms; Garden

landscaping and furniture; and commercial underground pits. Quatro Design specializes in supplying GRC planters and street furniture for the landscape and commercial industries.

Managing Director of Quatro Design, John Curry, said “White GRC products are very popular choices for our customers. The Aalborg White® Cement gives a clean white finish. And when used in oxide-coloured GRC it helps to give more vibrant and richer tones. We find that the Aalborg White® Cement performs excellently in our GRC applications, with its high consistency in performance and whiteness being the key factors”.

PROJECT PARTICIPANTS

GRC Manufacturer: Quatro Design
